

# What Happens When the Garbage Collector Runs?

Elton Stoneman  
[geekswithblogs.net/eltonstoneman](http://geekswithblogs.net/eltonstoneman)  
@EltonStoneman

**pluralsight**   
hardcore dev and IT training

What is the  
**Garbage Collector?**

How **IDisposable**  
works with the GC

**Best Practice**  
implementation of  
IDisposable

editing)

Note: Warning will not appear  
during Slide Show view.

# Demo 1: Profiling DatabaseState

## Goal

Demonstrate  
object allocation  
and GC collection

## Walkthrough

Profile memory  
usage for app  
using  
DatabaseState

## Walkthrough

Force garbage  
collection and  
show memory  
usage

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Demo 1: Profiling DatabaseState

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Demo 1: Profiling DatabaseState

```
private static DatabaseState _DatabaseState;
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Demo 1: Profiling DatabaseState

```
var databaseState = new DatabaseState();
```

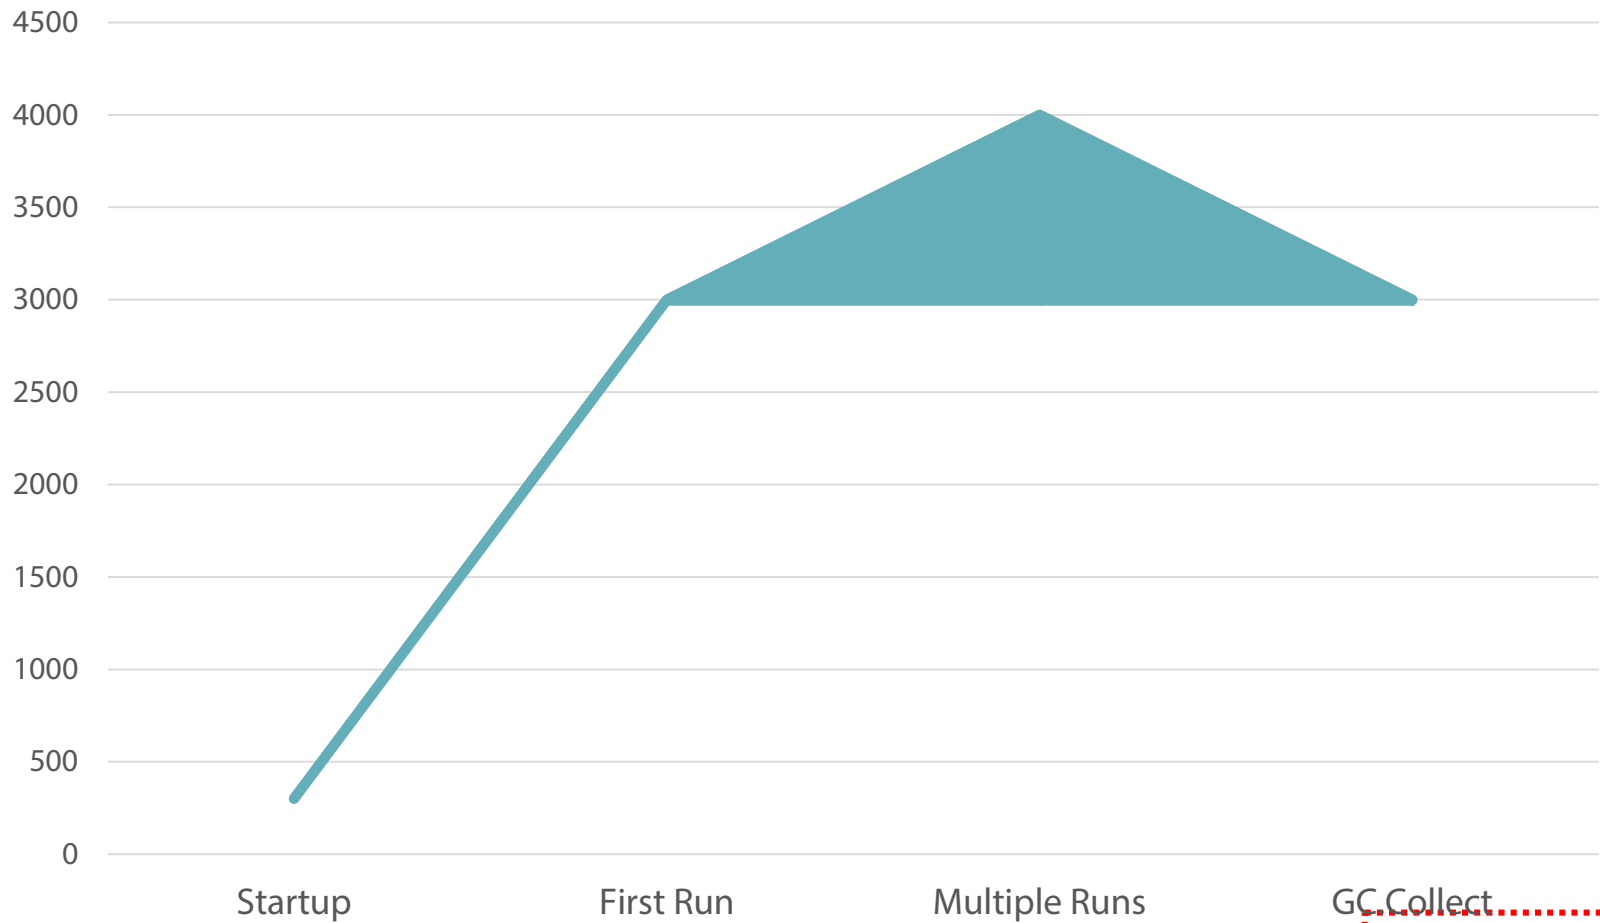

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Demo 1: Profiling SqlConnection

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Demo 2: Implementing IDisposable

## Goal

Show correct  
implementation  
of IDisposable

## Walkthrough

Implement  
IDisposable using  
standard pattern

## Walkthrough

Run under  
memory profiler  
and show memory  
usage

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Demo 2: Implementing IDisposable

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

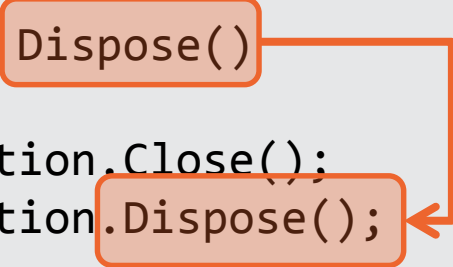

## Demo 2: Implementing IDisposable

```
public class DatabaseState : IDisposable
{
    private SqlConnection _connection;

    /* ... */

    public void Dispose()
    {
        _connection.Close();
        _connection.Dispose();
    }
}
```

An orange box highlights the `Dispose()` parameter in the `public void Dispose()` signature. Another orange box highlights the `_connection.Dispose();` line within the method body. An orange arrow points from the first box to the second, indicating that the `Dispose()` method is responsible for disposing of the `_connection` object.

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

## Best Practice #2

**If you use IDisposable  
objects as instance fields,  
implement IDisposable**

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

## Best Practice #2

```
public class DatabaseState : IDisposable
{
    private SqlConnection _connection;
```

```
public void Dispose()
{
    Dispose(true);
    GC.SuppressFinalize(this);
}
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

## Best Practice #2

```
protected virtual void Dispose(bool disposing)
{
    if (disposing)
    {
        if (_connection != null)
        {
            _connection.Dispose();
            _connection = null;
        }
    }
}
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

## **Best Practice #3**

**Allow Dispose() to be called multiple times and don't throw exceptions**

**Do Not Place Anything in This Space**

(Add watermark during editing)

Note: Warning will not appear during Slide Show view.

## Best Practice #3

```
protected virtual void Dispose(bool disposing)
{
    if (disposing)
    {
        if (_connection != null)
        {
            _connection.Dispose();
            _connection = null;
        }
    }
}
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Dispose and Finalize

```
public class ClassWithFinalizer : IDisposable
{
    public void Dispose() { /* ... */ }
    ~ClassWithFinalizer() { /* ... */ }
}
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Dispose and Finalize

```
public class ClassWithFinalizer : IDisposable
{
    public void Dispose() { /* ... */ }
    ~ClassWithFinalizer() { /* ... */ }
}
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Demo 3: Dispose and Finalize

## Goal

Show correct implementation of Dispose and Finalize

## Walkthrough

Clean up managed resources when disposing in the derived class

## Walkthrough

Clean up unmanaged resources in the finalizer

**Do Not Place Anything in This Space**

(Add watermark during editing)

Note: Warning will not appear during Slide Show view.

# Demo 3: Dispose and Finalize

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

## Demo 3: Dispose and Finalize

```
public class UnmanagedDatabaseState : DatabaseState
{
    private SqlCommand _command;
    private IntPtr _unmanagedPointer;
```

```
protected override void Dispose(bool disposing)
{
    if (disposing && _command != null)
    {
        _command.Dispose();
        _command = null;
    }
    //unmanaged resources...
    base.Dispose(disposing);
}
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

## Demo 3: Dispose and Finalize

```
protected override void Dispose(bool disposing)
{
    //managed resources...
    if (_unmanagedPointer != IntPtr.Zero)
    {
        Marshal.FreeHGlobal(_unmanagedPointer);
        _unmanagedPointer = IntPtr.Zero;
    }
    base.Dispose(disposing);
}
```

```
~UnmanagedDatabaseState()
{
    Dispose(false);
}
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

## Best Practice #4

**Implement IDisposable to  
support disposing resources  
in a class hierarchy**

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Best Practice #4

```
public class DatabaseState : IDisposable
```

```
{  
    Dispose(true);  
    GC.SuppressFinalize(this);  
}
```

```
protected virtual void Dispose(bool disposing)
```

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

## **Best Practice #5**

**If you use unmanaged resources, declare a finalizer which cleans them up**

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Best Practice #5

```
~UnmanagedDatabaseState()
```

```
{
```

```
    Dispose(false);
```

```
}
```

```
protected override void Dispose(bool disposing)
```

```
{
```

```
    //managed resources...
```

```
    if (_unmanagedPointer != IntPtr.Zero)
```

```
    {
```

```
        Marshal.FreeHGlobal(_unmanagedPointer);
```

```
        _unmanagedPointer = IntPtr.Zero;
```

```
    }
```

```
    base.Dispose(disposing);
```

```
}
```

**DO NOT Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.

# Summary

- **What does the Garbage Collector do?** ☐
  - Keeping available memory free
  - Without impacting performance
- **When the GC runs** ☐
  - When it decides to
  - Could have build-up of dead objects
- **Implementing IDisposable** ☐
  - Disposing managed resources
  - Expecting Dispose to be repeatedly called
  - Allowing inheritors to dispose their resources
  - Using finalizers to clean up unmanaged resources

What Happens  
if you don't  
Dispose?

**Do Not Place Anything  
in This Space**

(Add watermark during  
editing)

Note: Warning will not appear  
during Slide Show view.
